

Sohrab Taee

Senior Software Engineer
Berlin, Germany

I'm a software engineer with **8+ years** of experience. For most of my career, I've been focused on the **front-end**, plus a few years of WordPress development.

I've worked as a team-lead, a consultant, a developer in agile-based product teams, and a solo developer. I've been also involved in interviewing and mentoring developers.

My technical workflow consists of using Git, writing well-tested maintainable code, and conducting code reviews.

I also have a keen eye for UX.

I do my best to have a balance in every aspect of my career and personal life.

I'm a constant learner and I value personal development.

I enjoy working in **transparent, trust-based**, and **feedback-oriented** environments.

I love traveling, music, and technology.
